First Things First

Let's begin by saying that we are glad that you are considering being married in one of our Churches. We are happy to share this special day with you and every effort will be made by members of Parish to make you feel at home and to make your wedding day a joyous occasion.

This leaflet outlines most of what you need to know when considering a Church Wedding.

Careful planning is essential if you want your wedding day to be a day to remember without disappointment. We are here to help you with your planning, and have had a lot of experience with what helps to make a happy and memorable occasion.

Ministers / Celebrants from other denominations are welcome but would need to work with our Clergy, who would be happy to work alongside your Minister / Celebrant. We would ensure that we provide hospitality to you and your party. The date and time of your wedding, and wedding rehearsal, is confirmed at your first meeting with the officiating priest, and is entered in diaries and in the church's booking calendar.

Marriage Licence

The Marriage Licence is obtained from the Registrar of Marriages. Application forms are available online or from the Registrars Office, at Palmerston North Courthouse. The licence is valid for three months and we recommend that you make your application at least six weeks before the wedding, as it will have to be reissued if there are any mistakes on the form. The officiating priest will need to receive your licence prior to the wedding, at the latest at the wedding rehearsal.

Services

The Church offers a choice of services, and the officiating priest will work through these with you to produce something special, unique and authentic to you. If there are prayers, readings, etc. you would like to include in your service, please discuss these with the priest.

Music

The church organists are pleased to play for your wedding. You will need to think about music for the entry of the bride, during the signing of the Register, and for the end as you leave as a newly married couple. We are flexible with music and have the latest technology that allows live streaming
